

SECURE DUMPSTER / THE BUILD AT A GLANCE

Free contractor sequence | Site check and permit first | 4 models | signed drawings govern

01 SITE & PERMIT

Select model; measure; confirm site hazards, city codes and reviewer requirements.

02 KIT & CREW

Receive BOM; plan refuse service outage, inspections and worksite safety.

03 LOCATES & BMPs

811 cleared; protect the storm drain; control dust, slurry and washout.

04 LAYOUT & FOOTINGS

Layout, excavate and place foundations only per site-authorized structural details.

05 ANCHORS & FRAME

Special inspection arranged; install approved anchor, posts and beam systems.

06 ROOF & CLADDING

Connect roof framing, deck, wall panels and gates per the signed sheets.

07 INSPECT & CLOSE

Final inspection, photo record, restore service and maintenance tracking.

NOT A CONSTRUCTION PLAN OR PERMIT SUBMITTAL

Obtain the current site-licensed architectural and intact engineer-signed structural PDFs; confirm local approval and all site-specific conditions. No state-to-state engineering approval is implied. Structural quantities and details are intentionally not reproduced here.
